American Journal of Physiology:
Endocrinology and Metabolism

No. 1. JANUARY 1997

Effect of magnesium on parathyroid cells: evidence for two sensing receptors or two intracellular pathways?
H. Miki, P. B. Maercklein, and L. A. Fitzpatrick E1

Effect of in vivo injection of cholera and pertussis toxin on glucose transport in rat skeletal muscle
T. Ploug, X. Han, L. N. Petersen, and H. Galbo E7

Effects of dihydropyridines on aldosterone secretion in adrenal capsule preparations from pregnant rats
M. Brochu, S. Picard, S. Jodoin, and J. St-Louis E18

Retinol is specifically required during midgestation for neonatal survival
D. M. Wellik, D. H. Norback, and H. F. DeLuca E25

Effects of bis(maltolato)oxovanadium(IV) are distinct from food restriction in STZ-diabetic rats
V. G. Yuen, C. Orvig, and J. H. McNeill E30

Maintaining muscle protein anabolism after a metabolic stress: role of dextrose vs. amino acid availability
M. J. Borel, P. E. Williams, K. Jabbour, J. C. Hibbard, and P. J. Flakoll E36

Skeletal muscle myosin heavy-chain synthesis rate in healthy humans
P. Balagopal, O. Ljungqvist, and K. S. Nair E45

Use of labeling pattern of liver glutamate to calculate rates of citric acid cycle and gluconeogenesis
V. Large, H. Brunengraber, M. Odeon, and M. Beylot E51

Metabolic adaptation to protein restriction in insulin-dependent diabetes mellitus
L. J. Hoffer, A. Taveroff, and A. Schiffrin E59

Separate and joint effects of arginine and glucose on ovine fetal insulin secretion
A. Gresores, S. Anderson, D. Hood, G. O. Zerbe, and W. W. Hay, Jr. E68

Effects and metabolism of fumarate in the perfused rat heart. A ^{13}C mass isotopomer study
A. Laplante, G. Vincent, M. Poirier, and C. Des Rosiers E74

Urinary biotin analogs increase in humans during chronic supplementation: the analogs are biotin metabolites
D. M. Mock and G. M. Heird E83

Persistent glucose production and greater peripheral sensitivity to insulin in the neonate vs. the adult
H. M. Farrag, L. M. Nawrath, J. E. Healey, E. J. Dorcus, R. E. Rapoza, W. Oh, and R. M. Cowett E86

Effect of rhGH and rhIGF-I treatment on protein utilization in elderly women
G. E. Butterfield, J. Thompson, M. J. Rennie, R. Marcus, R. L. Hintz, and A. R. Hoffman E94

Different physiological traits underlying increased body fat of fatty (*fa/fa*) and heterozygous (*+/fa*) rats
K. Schwarzer, H. Döring, and I. Schmidt E100

Leucine metabolism in chronically hypoglycemic hypoinsulinemic growth-restricted fetal sheep
T. D. Carver, A. A. Quick, C. C. Teng, A. W. Pike, P. V. Fennessey, and W. W. Hay, Jr. E107

Contraction-induced intracellular signals and their relationship to muscle GLUT-4 concentration
B. B. Yaspelkis III, A. L. Castle, R. P. Farrar, and J. L. Ivy E118

Mechanisms of centrally administered ET-1-induced increases in systemic arterial pressure and AVP secretion
N. F. Rossi, D. S. O'Leary, and H. Chen E126

Insulin regulates liver glycogen synthase and glycogen phosphorylase activity reciprocally in rhesus monkeys
H. K. Ortmeyer, N. L. Bodkin, and B. C. Hansen E133

Aging alters calcium regulation of serum concentration of parathyroid hormone in healthy men
A. A. Portale, E. T. Lonergan, D. M. Tanney, and B. P. Halloran E139

Time course of insulin resistance associated with feeding dogs a high-fat diet
A. P. Rocchini, P. Marker, and T. Cervenka E147

Measurement of hepatic R_a UDP-glucose in vivo in rats: relation to glycogen deposition and labeling patterns
M. K. Hellerstein, A. Letscher, J.-M. Schwarz, D. César, C. H. L. Shackleton, S. Turner, R. Neese, K. Wu, S. Bock, and S. Kaempfer E155

Altered fluxes responsible for reduced hepatic glucose production and gluconeogenesis by exogenous glucose in rats
M. K. Hellerstein, R. A. Neese, J.-M. Schwarz, S. Turner, D. Faix, and K. Wu E163

Altered metabolism and superoxide generation in neural tissue of rat embryos exposed to high glucose
X. Yang, L. A. Håkan Borg, and U. J. Eriksson E173

No. 2. FEBRUARY 1997

Differential regulation of macrophage arginine metabolism: a proposed role in wound healing
J. D. Shearer, J. R. Richards, C. D. Mills, and M. D. Caldwell E181

Hormone-specific alterations of T_4, T_3, and reverse T_3 metabolism with recent ethanol abstinence in humans
E. M. Kaptein E191

Effect of oxidant challenge on contractile function of the aging rat diaphragm
J. M. Lawler, C. C. Cline, Z. Hu, and J. R. Coast E201

Prostaglandin $F_{2\alpha}$ stimulates interleukin-6 synthesis via activation of PKC in osteoblast-like cells
O. Kozawa, A. Suzuki, H. Tokuda, and T. Uematsu E208

Site selectivity of osteoblast gene expression response to thyroid hormone localized by in situ hybridization
S. Suwanwalaikorn, M. Van Auken, M.-I. Kang, S. Alex, L. E. Braverman, and D. T. Baran E212

Disorderly and nonstationary insulin secretion in relatives of patients with NIDDM
O. Schmitz, N. Pørksen, B. Nyholm, C. Skjærbæk, P. C. Butler, J. D. Veldhuis, and S. M. Pincus E218

Thyroid hormone stimulates renin synthesis in rats without involving the sympathetic nervous system
H. Kobori, A. Ichihara, H. Suzuki, Y. Miyashita, M. Hayashi, and T. Saruta E227

Nutritional status affects branched-chain oxoacid dehydrogenase activity during exercise in humans
M. L. Jackman, M. J. Gibala, E. Hultman, and T. E. Graham E233

Tricarboxylic acid cycle intermediates in human muscle at rest and during prolonged cycling
M. J. Gibala, M. A. Tarnopolsky, and T. E. Graham E239

C-peptide does not alter carbohydrate metabolism in isolated mouse muscle
P. N. Shashkin, Y. Jiao, H. Westerblad, and A. Katz E245

Negative energy balance with exercise in identical twins: plasma glucose and insulin responses
J.-M. Oppert, A. Nadeau, A. Tremblay, J.-P. Després, G. Thériault, and C. Bouchard E248

Induction of human skeletal muscle lipoprotein lipase gene expression by short-term exercise is transient
R. L. Seip, K. Mair, T. G. Cole, and C. F. Semenkovich E255

Electrical stimulation inactivates muscle acetyl-CoA carboxylase and increases AMP-activated protein kinase
C. A. Hutber, D. G. Hardie, and W. W. Winder E262

Glucose utilization and glucose transporter proteins GLUT-1 and GLUT-3 in brains of diabetic (*db/db*) mice
S. J. Vannucci, E. M. Gibbs, and I. A. Simpson E267

Ovine fetal leucine kinetics and protein metabolism during acute metabolic acidosis
J. R. Milley E275

Phenotypic characterization and functional correlation of α-MSH binding to pituitary cells
T. Zheng, C. Villalobos, K. D. Nusser, T. W. Gettys, W. J. Faught, J. P. Castaño, and L. S. Frawley E282

Prolonged suppression of glucose metabolism causes insulin resistance in rat skeletal muscle
J. K. Kim and J. H. Youn E288

IGF-binding protein-2 is induced during development of urinary bladder hypertrophy in the diabetic rat
Y. Chen, B. Gustafsson, and H. J. Arnqvist E297

Persistently enhanced sensitivity of pancreatic islets from *ob/ob* mice to PKC-stimulated insulin secretion
N.-G. Chen and D. R. Romsos E304

Acute modulation of active carrier-mediated brain-to-blood transport of corticotropin-releasing hormone
J. M. Martins, W. A. Banks, and A. J. Kastin E312

RAPID COMMUNICATIONS

Effects of exercise training on glucose transport and cell surface GLUT-4 in isolated rat epitrochlearis muscle
T. H. Reynolds IV, J. T. Brozinick, Jr., M. A. Rogers, and S. W. Cushman E320

Roles of PI 3-kinase and Ras on insulin-stimulated glucose transport in 3T3-L1 adipocytes
H. Katagiri, T. Asano, K. Inukai, T. Ogihara, H. Ishihara, Y. Shibasaki, T. Murata, J. Terasaki, M. Kikuchi, Y. Yazaki, and Y. Oka E326

No. 3. MARCH 1997

Mechanisms of host wasting induced by administration of cytokines in rats
P. R. Ling, J. H. Schwartz, and B. R. Bistrian E333

Functional differences in lipid metabolism in resting skeletal muscle of various fiber types
D. J. Dyck, S. J. Peters, J. Glatz, J. Gorski, H. Keizer, B. Kiens, S. Liu, E. A. Richter, L. L. Spriet, G. J. van der Vusse, and A. Bonen E340

IGF-I inhibits burst mass of pulsatile insulin secretion at supraphysiological and low IGF-I infusion rates
N. Pørksen, M. A. Hussain, T. L. Bianda, B. Nyholm, J. S. Christiansen, P. C. Butler, J. D. Veldhuis, E. R. Froesch, and O. Schmitz E352

Carnitine effects on coenzyme A profiles in rat liver with hypoglycin inhibition of multiple dehydrogenases
Y. K. Lieu, B. Y. L. Hsu, W. A. Price, B. E. Corkey, and C. A. Stanley E359

Glutamate transport and not cellular content modulates paracellular permeability in LLC-PK_1-F^+ cells
T. C. Welbourne and D. Chevalier E367

Glucagon enhances the direct suppressive effect of insulin on hepatic glucose production in humans
G. F. Lewis, M. Vranic, and A. Giacca E371

Agouti regulation of intracellular calcium: role of melanocortin receptors
J. H. Kim, L. L. Kiefer, R. P. Woychik, W. O. Wilkison, A. Truesdale, O. Ittoop, D. Willard, J. Nichols, and M. B. Zemel E379

Progressive increase in glucose transport and GLUT-4 in human sarcolemmal vesicles during moderate exercise
S. Kristiansen, M. Hargreaves, and E. A. Richter E385

Discordance of prolactin gene transcription, mRNA storage, and hormone release in individual mammotropes
J. P. Castaño, W. J. Faught, E. E. Glavé, B. S. Russell, and L. S. Frawley E390

Acute exercise attenuates age-associated resistance to insulin-like growth factor I
P. E. Willis, S. Chadan, V. Baracos, and W. S. Parkhouse E397

Characterization of a hyperpolarization-activated cation current in rat pituitary cells
S. M. Simasko and S. Sankaranarayanan E405

AT_1 receptor blockade and the sympathoadrenal response to insulin-induced hypoglycemia in humans
R. H. Worck, H. Ibsen, E. Frandsen, and H. Dige-Petersen E415

Preclinical screening of the applicability of strontium as a marker for intestinal calcium absorption
A. J. A. M. Sips, R. Barto, J. C. Netelenbos, and W. J. F. van der Vijgh E422

Arginine vasopressin and baroreflex function after converting enzyme inhibition in normal humans
S. R. Goldsmith E429

Regulation of gluconeogenesis by glutamine in normal postabsorptive humans
G. Perriello, N. Nurjhan, M. Stumvoll, A. Bucci, S. Welle, G. Dailey, D. M. Bier, I. Toft, T. G. Jenssen, and J. E. Gerich E437

Decline in muscle insulin-dependent and -independent glucose uptake but not GLUT-4 in 21- vs. 28-day-old rats
G. D. Cartee, T. J. Wetter, A. N. Guerra, and T. N. Cox E446

Transient upregulation of IGF-I gene expression in brown adipose tissue of cold-exposed rats
C. Duchamp, K. A. Burton, A. Géloën, and M. J. Dauncey E453

Endothelin stimulates osteoblastic production of IL-6 but not macrophage colony-stimulating factor
S. L. Perkins, E. Sarraj, S. J. Kling, and D. E. Kohan E461

Daily energy expenditure in free-living heart failure patients
M. J. Toth, S. S. Gottlieb, M. I. Goran, M. L. Fisher, and E. T. Poehlman E469

Glucose production, recycling, Cori cycle, and gluconeogenesis in humans: relationship to serum cortisol
J. A. Tayek and J. Katz E476

MODELING IN PHYSIOLOGY

Transthyretin is not essential for thyroxine to reach the brain and other tissues in transthyretin-null mice
J. A. Palha, M. T. Hays, G. Morreale de Escobar, V. Episkopou, M. E. Gottesman, and M. J. M. Saraiva E485

Glucose kinetics in interstitial fluid can be predicted by compartmental modeling
A. Gastaldelli, J.-M. Schwarz, E. Caveggion, L. D. Traber, D. L. Traber, J. Rosenblatt, G. Toffolo, C. Cobelli, and R. R. Wolfe E494

A mathematical model of diurnal variations in human plasma melatonin levels
E. N. Brown, Y. Choe, T. L. Shanahan, and C. A. Czeisler E506

No. 4. APRIL 1997

Central opioid receptors mediate glucoprivic inhibition of pituitary LH secretion
K. P. Briski E517

Glucose-fatty acid interactions in prepubertal and pubertal children: effects of lipid infusion
S. Arslanian and C. Suprasongsin E523

Interaction of exercise, insulin, and hypoglycemia studied using euglycemic and hypoglycemic insulin clamps
B. A. Zinker, R. G. Allison, D. B. Lacy, and D. H. Wasserman E530

Glucose regulation of islet amyloid polypeptide gene expression in rat pancreatic islets
R. Gasa, R. Gomis, R. Casamitjana, F. Rivera, and A. Novials E543

Long- and medium-chain triglycerides during parenteral nutrition in critically ill patients
B. Delafosse, J. P. Viale, C. Pachiaudi, S. Normand, J. Goudable, Y. Bouffard, G. Annat, and O. Bertrand E550

Glucoregulation during progressive starvation in late pregnancy in the rat
M. J. Holness and M. C. Sugden E556

Gender-dependent effects of exercise training on serum leptin levels in humans
M. S. Hickey, J. A. Houmard, R. V. Considine, G. L. Tyndall, J. B. Midgette, K. E. Gavigan, M. L. Weidner, M. R. McCammon, R. G. Israel, and J. F. Caro E562

Brain of the conscious dog is sensitive to physiological changes in circulating insulin
S. N. Davis, B. Dunham, K. Walmsley, C. Shavers, D. Neal, P. Williams, and A. D. Cherrington E567

Insulin stimulation of human adipocytes activates the kinase of only a fraction of the insulin receptors
H. H. Klein, B. Kowalewski, M. Drenckhan, and H.-L. Fehm E576

Influence of protein intake on whole body and splanchnic leucine kinetics in humans
M. Cayol, Y. Boirie, F. Rambourdin, J. Prugnaud, P. Gachon, B. Beaufrère, and C. Obled E584

Amino acids suppress proteolysis independent of insulin throughout the neonatal period
B. B. Poindexter, C. A. Karn, J. A. Ahlrichs, J. Wang, C. A. Leitch, E. A. Liechty, and S. C. Denne E592

Insulin stimulates cell surface aminopeptidase activity toward vasopressin in adipocytes
J. J. Herbst, S. A. Ross, H. M. Scott, S. A. Bobin, N. J. Morris, G. E. Lienhard, and S. R. Keller E600

Insulin receptor mRNA splicing and altered metabolic control in aged and mildly insulin-deficient rats
M. M. L. Wiersma, D. Auboeuf, I. M. Nieuwenhuizen-Bakker, J. K. Radder, J. P. Riou, and H. Vidal E607

Nongenomic effects of aldosterone on intracellular calcium in porcine endothelial cells
M. Schneider, A. Ulsenheimer, M. Christ, and M. Wehling E616

Steady-state and non-steady-state measurements of plasma glutamine turnover in humans
M. E. Kreider, M. Stumvoll, C. Meyer, D. Overkamp, S. Welle, and J. Gerich E621

rhIGF-I administration in humans: differential metabolic effects of bolus vs. continuous subcutaneous delivery
N. Mauras, P. M. Martha, Jr., V. Quarmby, and M. W. Haymond E628

Insulin secretion in adult rats that had experienced different underfeeding patterns during their development
M. A. Martín, C. Alvarez, L. Goya, B. Portha, and A. M. Pascual-Leone E634

Malonyl-CoA regulation in skeletal muscle: its link to cell citrate and the glucose-fatty acid cycle
A. K. Saha, D. Vavvas, T. G. Kurowski, A. Apazidis, L. A. Witters, E. Shafrir, and N. B. Ruderman E641

Role of glycogen concentration and epinephrine on glucose uptake in rat epitrochlearis muscle
J. Jensen, R. Aslesen, J. L. Ivy, and O. Brørs E649

Anti-TNF treatment does not reverse the abnormalities in lipid metabolism of the obese Zucker rat
J. López-Soriano, F. J. López-Soriano, G. J. Bagby, D. H. Williamson, and J. M. Argilés E656

Phosphatidylinositol 3-kinase and dynamics of insulin resistance in denervated slow and fast muscles in vivo
J. S. Elmendorf, A. Damrau-Abney, T. R. Smith, T. S. David, and J. Turinsky E661

Regulation of insulin secretion via ATP-sensitive K^+ channel independent mechanisms: role of phospholipase C
W. S. Zawalich and K. C. Zawalich E671

Whole body and splanchnic metabolic and circulatory effects of glucose during β-adrenergic receptor inhibition
T. Brundin, A.-K. Aksnes, and J. Wahren E678

Human skeletal muscle protein breakdown during spaceflight
T. P. Stein and M. D. Schluter E688

MODELING IN PHYSIOLOGY

Measurement and modeling of glucose-6-phosphatase in pancreatic islets
I. R. Sweet, H. Najafi, G. Li, J. Grodberg, and F. M. Matschinsky E696

RAPID COMMUNICATIONS

Clenbuterol, a β_2-adrenoceptor agonist, reduces scoliosis due to partial transection of rat spinal cord
R. J. Zeman, Y. Zhang, and J. D. Etlinger E712

Chronic insulin hypoglycemia induces GLUT-3 protein in rat brain neurons
Y. Uehara, V. Nipper, and A. L. McCall E716

LETTERS TO THE EDITOR

Speed of glucagon's glycogenolytic effect
N. Geary, E. Scharrer, and W. Langhans; F. Q. Nuttall and N. Ercan-Fang E720

No. 5. MAY 1997

INVITED REVIEW

Renal assimilation of oligopeptides: physiological mechanisms and metabolic importance
S. A. Adibi E723

Impaired phosphoinositide metabolism in glucose-incompetent islets of neonatally streptozotocin-diabetic rats
L. Morin, M.-H. Giroix, M.-N. Gangnerau, D. Bailbé, and B. Portha E737

Direct quantification of norepinephrine spillover and hormone output from the pancreas of the conscious dog
B. E. Dunning, M. F. Scott, D. W. Neal, and A. D. Cherrington E746

Role of the kidney in plasma glucose regulation during hyperglycemia
E. Cersosimo, M. Ajmal, R. J. Naukam, P. E. Molina, and N. N. Abumrad E756

Adenosine exerts a glycogen-sparing action in contracting rat skeletal muscle
L. Vergauwen, E. A. Richter, and P. Hespel E762

Involvement of MAP kinase and c-*fos* signaling in the inhibition of cell growth by somatostatin
H. Yoshitomi, Y. Fujii, M. Miyazaki, N. Nakajima, N. Inagaki, and S. Seino E769

Role of the autonomic nervous system in the thermogenic response to food in lean individuals
L. De Jonge and D. R. Garrel E775

Density of fat-free body mass: relationship with race, age, and level of body fatness
M. Visser, D. Gallagher, P. Deurenberg, J. Wang, R. N. Pierson, Jr., and S. B. Heymsfield E781

Decreased plasma glutamine level and $CD4^+$ T cell number in response to 8 wk of anaerobic training
V. Hack, C. Weiss, B. Friedmann, S. Suttner, M. Schykowski, N. Erbe, A. Benner, P. Bärtsch, and W. Dröge E788

Determination of protein synthesis in human rectal cancer in situ by continuous [1-^{13}C]leucine infusion
W. H. Hartl, H. Demmelmair, K.-W. Jauch, H.-L. Schmidt, B. Koletzko, and F. W. Schildberg E796

Blockade of the renin-angiotensin-aldosterone system prevents growth hormone-induced fluid retention in humans
J. Møller, N. Møller, E. Frandsen, T. Wolthers, J. O. L. Jørgensen, and J. S. Christiansen E803

Interactions between thyroid hormone and tryptophan transport in rat liver are modulated by thyroid status
H. F. Kemp and P. M. Taylor E809

Fetal sheep endocrine responses to sustained hypoxemic stress after chronic fetal placental embolization
R. Gagnon, J. Murotsuki, J. R. G. Challis, L. Fraher, and B. S. Richardson E817

Comparative metabolism and distribution of rabbit heparin cofactor II and rabbit antithrombin in rabbits
M. W. C. Hatton, H. Hoogendoorn, S. M. R. Southward, B. Ross, and M. A. Blajchman E824

Prostaglandin-endoperoxide H synthase-2 expression and activity increases with term labor in human chorion
J. E. Mijovic, T. Zakar, T. K. Nairn, and D. M. Olson E832

Postprandial stimulation of muscle protein synthesis is independent of changes in insulin
E. Svanberg, L. S. Jefferson, K. Lundholm, and S. R. Kimball E841

Effects of exercise and feeding on the hexosamine biosynthetic pathway in rat skeletal muscle
B. A. Nelson, K. A. Robinson, J. S. Koning, and M. G. Buse E848

Effects of diabetes on rodent cardiac thyroid hormone receptor and isomyosin expression
F. Haddad, P. W. Bodell, S. A. McCue, and K. M. Baldwin E856

Exercise training reverses insulin resistance in muscle by enhanced recruitment of GLUT-4 to the cell surface
G. J. Etgen, Jr., J. Jensen, C. M. Wilson, D. G. Hunt, S. W. Cushman, and J. L. Ivy E864

Coupling of oxytocin receptor to G proteins in rat myometrium during labor: G_i receptor interaction
Z. Strakova, and M. S. Soloff E870

Intrauterine growth restriction does not alter response of protein synthesis to feeding in newborn pigs
T. A. Davis, M. L. Fiorotto, D. G. Burrin, W. G. Pond, and H. V. Nguyen E877

Progesterone-induced changes in sleep in male subjects
E. Friess, H. Tagaya, L. Trachsel, F. Holsboer, and R. Rupprecht E885

Placental transport of threonine and its utilization in the normal and growth-restricted fetus
A. H. Anderson, P. V. Fennessey, G. Meschia, R. B. Wilkening, and F. C. Battaglia E892

Energy expenditure of adult male rhesus monkeys during the first 30 mo of dietary restriction
